SUMMARY

Year 4 Design and Artificial Intelligence undergraduate with a strong foundation in product design, web development, and 3D visualisation. Experienced in bridging the gap between physical design and digital interaction, with a proven track record in UI/UX prototyping, full-stack web development (React, TypeScript), and CAD engineering. Passionate about leveraging AI and immersive technologies to create intuitive, user-centric solutions.

EDUCATION

Singapore University of Technology and Design (SUTD) | Sep 2022 – Present

- Bachelor of Science in Design and Artificial Intelligence
- Year 4 Undergraduate

Nanyang Polytechnic | Apr 2019 – Mar 2022

- Diploma in Chemical & Pharmaceutical Technology
- Awards: Director's List (Sem 1 AY19/20, Sem 2 AY19/20, Sem 1 AY20/21)

WORK EXPERIENCE

GXS Bank | Product Design Intern | Sep 2024 – Jan 2025

- Designed and implemented a cohesive library of custom icons for diverse financial portfolios, ensuring alignment with the GXS visual identity.
- Crafted and refined UX microcopy for the mobile app, optimising user clarity and maintaining a consistent brand voice across customer journeys.
- Synthesised user research findings into actionable insights, helping the design team prioritise feature improvements and resolve user pain points.

Evoqua Water Technologies | Internship | Mar 2021 – Aug 2021

- Conducted experimental testing to validate the efficiency of water treatment products and protocols.
 - Supported R&D initiatives by performing research to optimise company technologies and process efficiency.
-

PROJECTS

CAYRA (Drone Redesign & 3D Printing) | Sep 2025 – Dec 2025

- Product Redesign: Utilised Fusion 360 to redesign the BetaFPV drone chassis, engineering a central compression lock system to enable tool-less assembly and rapid maintenance.
- Rapid Prototyping: Iterated through multiple design versions (V1–V3) via 3D printing to resolve weight constraints and flight vibration issues, ultimately solving maintenance bottlenecks caused by micro-fasteners.
- Validation: Conducted flight validation tests to ensure the new tool-less design maintained structural integrity and flight stability.

AI-Powered Mental Health Journal | Web Application

- Dual-Model Architecture: Integrated two distinct machine learning models to analyse user journal entries, providing granular classification for both emotional state and depression severity.
- Intelligent Intervention: Engineered an AI agent that monitors severity levels in real-time, automatically triggering context-aware support guides and resources for users identified in the severe depression spectrum.
- Web Development: Designed a private, user-friendly interface to encourage daily reflection while ensuring seamless interaction with the backend analysis tools.

The Keepsakes | Web Application

- Concept & UI/UX: Conceptualised a "digital sanctuary" for memories (inspired by paper stars), utilising Figma to wireframe authentication flows and prototype the user interface.
- Development: Built the application using TypeScript, integrating a Three.js 3D mason jar model to visualise the "digitised nostalgia" concept.

Perfume Collection | Web Application

- 3D Integration: Developed an interactive showcase for a personal perfume collection, utilising React Three Fiber to render and display custom 3D modelled perfume bottles.
- Front-End Engineering: Prototyped the layout in Figma before implementing the interface with TypeScript and React, ensuring a responsive design that highlights the visual fidelity of the 3D assets.

Ninjector (Product Design Studio) | Jan 2024 – Apr 2024

- Product Design: Engineered a functional prototype using Fusion 360, ensuring dimensional precision and mechanical functionality.
- Software Development: Programmed an OLED display interface using C++ to provide real-time user feedback.
- Simulation: Utilised Blender to generate realistic product usage simulations for design evaluation and visualisation.

Hackathons

- GenAI x Temasek Hackathon: Developed an LLM-powered news aggregator to filter real-time data and generate targeted content summaries.
- Create4Good Hackathon: Engineered an AI-driven career coach using a customized GPT to provide interview preparation and resume feedback.

CO-CURRICULAR ACTIVITIES

SUTD Rotaract Club | Community Service Director | Feb 2023 – Feb 2024

- Spearheaded the planning and execution of diverse community events, fostering strong member engagement.
- Liaised with external organisations to establish partnerships and ensure alignment on community service objectives.

SUTD Rotaract Club | Member | Jan 2023

- Youth Expedition Project (Ho Chi Minh, Vietnam): Curated educational lessons tailored to local children's needs and assisted in constructing a recreational field to provide a safe play space.

SUTD Tchoukball Club | Member | Sep 2022 – Present

- Competitions: Represented SUTD in the Inter-Collegiate Club Games 2023 (2nd Place), Surf 'N' Sweat 2025, and SUNIG 2024 & 2025.

SKILLS

- Design & Modelling: Blender, Fusion 360, Adobe Illustrator, Procreate, Canva, Figma, UI/UX Design.
- Programming & Web: Python, C, C++, HTML, CSS, TypeScript, React, Three.js, React Three Fiber.
- Languages: English, Mandarin.
